

DSB Update
Sent: 06-July-2017

Please find below the most recent updates from the DSB:

July Webinar on TOTV

- DSB July webinar will be held on **Monday 17 July @ 1200 UTC** for 90 minutes
- The focus of the webinar will be the TOTV/uTOTV functionality proposed by the DSB
- The current draft of the functional specification can be found here:
<https://github.com/ANNA-DSB/ToTV-uToTV>
- To receive details of the webinar please email secretariat@anna-dsb.com

DSB Information Security Document

- The DSB's InfoSec document intended to satisfy the majority of information security questions expected from market participants wishing to connect systematically to the DSB
- The document is available to all FIX/ReST API connectors and can be obtained by emailing technical.support@anna-dsb.com

UAT Refresh

- The refresh of UAT will occur on **10 July**
- New templates and documentation are available on GitHub: <https://github.com/ANNA-DSB/Product-Definitions/tree/Release-ETA-10-July-2017>
- Please ensure that you have upgraded your JSON templates in advance of the DSB UAT refresh. Those that have not upgraded to the latest product templates will experience a loss of service from 10 July
- Whilst the DSB makes every endeavour to minimize the number of JSON template amendments, there are on occasion some updates which cannot be made backwards compatible. The DSB will be publishing an updated UAT release schedule offering insight into any further material changes which may arise as a result of industry and/or regulatory feedback and clarifications

UAT Status

- 134 organizations are now testing in UAT
- 57 organizations have requested FIX connectivity

Major Milestones

- 3 July – InfoSec Documentation
- 10 July – User Agreement publication + UAT Refresh
- 14 July – Updated Q&A documentation
- 17 July – Webinar on TOTV
- 2 Oct – Production
