

## NOTIFICATION: ANNA DSB UAT – REST and Web User Interface updates

**Audience:** REST API and Web users

**Implementation date in UAT:** 09<sup>th</sup> August 2017

### Notification details:

For web browser based users:

- A “Search Guide” that shows users how to create tailored search requests will be made available
- GUI search results in UAT will be increased to a maximum of 25 ISINs per page – up from a previous limit of 5 ISINs per page
- The DSB’s GUI and infrastructure will be safeguarded from rogue API users via the introduction of Google’s CAPTCHA service. This functionality will initially be enabled for logins and the creation of ISIN records. Further information can be found here: <https://www.google.com/recaptcha/intro/>

REST API users:

- REST API throttling will be enforced as of 9<sup>th</sup> August.
- Users seeking production level performance can contact DSB technical support to receive a token allowing production throttle limits to apply (currently 60 messages per minute)
- Users without a token will be throttled at the rate of one message per minute
- As a reminder, all users seeking to implement REST API functionality are requested to contact DSB technical support to ensure scalable connectivity

**Action Required:**

- REST API Users will find updated documentation at the following location: <http://github.com/ANNA-DSB/ReST/tree/master/docs>
- If you are a REST API user and did not receive the updated documentation as an attachment to this notification, please reply to this email and we will provide it.
- No action required for Web Users – FYI only
