Subject: REMINDER NOTIFICATION: DSB UAT – Product Definition Updates

Dear all,

Due to problems encountered when incorporating the new template schema the two issues below are outstanding. The corresponding fix is planned to be deployed on the 4th November to rectify the problem and will result in **all ISIN Data in UAT being wiped**. The change will take place during the below scheduled time:

Start Date: 02:00 am UTC, Saturday 4th

Completed Date: 12:00 pm UTC, Sunday 5th

Please note: ALL ISIN DATA IN UAT WILL BE **PURGED** THIS WEEKEND. Few records will be created this weekend that will remain on UAT.

GitHub Issues Details:

<https://github.com/ANNA-DSB/Functionality/issues/6>

Problem:

Fix of [GitHub issue # 5](#) deployed on 29/10 in UAT caused an issue whereby sending the same set of attributes as for an existing ISIN might cause a new ISIN been created instead of retrieving the existing one.

Impact:

The issue will only manifest

- when ISIN request has Price Multiplier with a zero in it, e.g. Price Multiplier=100
- ISIN existed for the same set of attributes prior 29/10

The issue will not manifest

- When ISIN request does not have Price Multiplier or Price multiplier does not have 0
- For any ISINs created after 29/10

<https://github.com/ANNA-DSB/Functionality/issues/7>

Problem: Some ISINs in the UAT environment that have been created prior to 29/10 release might have issues displaying in the GUI due to product definitions updates not being backward compatible

Impact: Error messages are encountered when fetching ISINs created prior to October 29th in the GUI for below Product definitions:

The issue will only manifest

- For ISINs created prior 29/10
- When displaying on the GUI
- For below Product definitions:
 - Commodities.Forward.Multi_Exotic_Forward.InstRefDataReporting.V1.json
 - Commodities.Option.Multi_Exotic_Option.InstRefDataReporting.V1.json
 - Commodities.Swap.Basis_Swap.InstRefDataReporting.V1.json
 - Commodities.Swap.Multi_Exotic_Swap.InstRefDataReporting.V1.json
 - Equity.Forward.Price_Return_Basic_Performance_Basket_CFD.InstRefDataReporting.V1.json
 - Equity.Forward.Price_Return_Basic_Performance_Basket.InstRefDataReporting.V1.json
 - Equity.Forward.Price_Return_Basic_Performance_Single_Index_CFD.InstRefDataReporting.V1.json
 - Equity.Forward.Price_Return_Basic_Performance_Single_Index.InstRefDataReporting.V1.json
 - Equity.Option.Basket.InstRefDataReporting.V1.json
 - Equity.Option.Single_Index.InstRefDataReporting.V1.json
 - Equity.Swap.Parameter_Return_Dividend_Basket.InstRefDataReporting.V1.json
 - Equity.Swap.Parameter_Return_Dividend_Single_Index.InstRefDataReporting.V1.json

Equity.Swap.Parameter_Return_Variance_Basket.InstRefDataReporting.V1.json
Equity.Swap.Parameter_Return_Variance_Single_Index.InstRefDataReporting.V1.json
Equity.Swap.Parameter_Return_Volatility_Basket.InstRefDataReporting.V1.json
Equity.Swap.Parameter_Return_Volatility_Single_Index.InstRefDataReporting.V1.json
Equity.Swap.Portfolio_Swap.InstRefDataReporting.V1.json
Equity.Swap.Price_Return_Basic_Performance_Basket_CFD.InstRefDataReporting.V1.json
Equity.Swap.Price_Return_Basic_Performance_Basket.InstRefDataReporting.V1.json
Equity.Swap.Price_Return_Basic_Performance_Single_Index_CFD.InstRefDataReporting.V1.j
son
Equity.Swap.Price_Return_Basic_Performance_Single_Index.InstRefDataReporting.V1.json
Foreign_Exchange.Swap.FX_Swap.InstRefDataReporting.V1.json

The issue will not manifest

- For any ISINs created after 29/10 release
- When using FIX/REST for sourcing ISINs
