

## NOTIFICATION: DSB UAT – FIX Certification Update

**Audience:** DSB FIX Users

**Implementation Date:** 26<sup>th</sup> November 2017

### Notification details:

The purpose of this note is to inform DSB FIX Users that the FIX Certification platform is now accessible over the standard HTTPS port 443. This change enhances connectivity solutions available for clients needing to complete FIX Certification prior to using the DSB's Production environment.

FIX Certification can be accessed via both links below.

<https://certs.anna-dsb.com:8443/conductor/login.html>

<https://certs.anna-dsb.com/conductor/login.html>

**The DSB would like to remind clients that successful completion of the FIX certification tests is a prerequisite before production login details are supplied**

The DSB FIX Certification User Guide can be found at <https://github.com/ANNA-DSB/FIX/tree/master/docs> for your reference.
