

NOTIFICATION: DSB FIX Production Release Schedule on 17th November 2018

Audience: All DSB FIX users

As per the notification sent on 4th October 2018, the DSB will release the below fixes into Production environment on the 17th November 2018.

Notification details:

The purpose of this notification is to inform the DSB users that the Production FIX environment will implement the fix for the following GitHub issues:

- [GitHub 2](#): Incorrect total record count returned when searching for ISINs by attributes via FIX
Resolution: User will receive the correct value of the total record count when searching for ISINs by attributes via FIX.
- [GitHub 6](#): Search for a non-existent ToTV record via FIX will return an incorrect response code of 560=4 (Instrument data temporarily available)
Resolution: User will receive a response of 560=2 (No instruments found that match selection criteria) when searching for a non-existent ToTV record via FIX.

Release schedule:

- 17th November 2018

Production Implementation Timeline:

- 12:00 PM UTC Saturday 17th November 2018 to 12:00 PM UTC Sunday 18th November 2018.

Action Required:

- DSB Production FIX environment will not be accessible during the regular maintenance window.
