

Dear All,

As communicated previously, the DSB will be following a two phase implementation approach to allow users as long UAT as possible:

1. 18th March – UAT deployment 1 - allows users to connect and test the DSB's UK ToTV/uToTV solution based on sample data created by the DSB (i.e. before integration with FCA FIRDS)
2. 25th March – UAT deployment 2 – provides users with ToTV version 2 records based on actual FCA FIRDS data

The DSB's UK ToTV/uToTV service is based on the scope previously documented [here](#).

The DSB will update the UAT environment on 25 March 2019 to deliver integration with FCA FIRDS , and to address any identified issues with the service, including issues documented on GitHub [here](#).

Please note that due to this update, the UAT system will be put into an early maintenance starting at 12:00 AM UTC Saturday 23rd March and will finish at the usual time of 08:00 AM UTC Sunday 24th March 2019 to allow for implementation.

The DSB welcomes continued feedback on its ToTV/uToTV service. Please send all feedback to technical.support@anna-dsb.com.

The ToTV version 2 JSON schema is available on GitHub [here](#).

The UK ToTV/uToTV FAQ is available [here](#).

Regards,
DSB Technical Support Team

Subject: RE: NOTIFICATION: Introduction of DSB's UK ToTV/uToTV service [in the event of a no-deal Brexit] - Final specification is available

Dear All,

The final specification for the DSB's UK ToTV/uToTV service is now available [here](#).

As a reminder, given the short implementation timeframe, and that access to the FCA FIRDS files is expected to be available for firms on [14 March 2019](#), the DSB has begun the development of its new UK ToTV/uToTV service using sample files created by the DSB.

As stated in 5 (d) Assumptions, key dependencies and impact, the DSB expects to be able to complete integration with FCA FIRDS within a week of publication of FCA FIRDS Reference Data files. For details on impact of FCA FIRDS availability to DSB's implementation timeline, please see **UPDATE (11-March-2019)** on page 7 [here](#).

Note in particular that unless material feedback is received to the contrary, the DSB is proposing to follow a two phase implementation approach to allow users as much time as possible to integrate their workflows, consume and process sample ToTV version 2 records:

- (1) 18th March – UAT deployment 1 - allows users to connect and test their workflows based on sample data (i.e. before integration with FCA FIRDS)
- (2) 25th March – UAT deployment 2 – provides users with ToTV version 2 records based on direct FCA FIRDS data

Users with a preference for only one week of UAT testing are requested to provide their feedback to technical.support@anna-dsb.com by 5pm UTC on Thursday 14 March.

Please note that an updated ToTV version 2 JSON schema is available on GitHub [here](#). The changes include:

- Renamed component: RefDataRecords (to avoid clashes with the FIRDS 'RefData')
- Renamed component: TransparencyDataRecords (for consistency)
- Removed FIRDS-TransparencyData component from UK component

Please refer to [UK ToTV/uToTV FAQ](#) section on the DSB website to find answers to questions the DSB has been asked on the topic.

Regards,
DSB Technical Support Team

Subject: RE: NOTIFICATION: Introduction of DSB's UK ToTV/uToTV service [in the event of a no-deal Brexit] - Draft specification is available

Dear All,

The DSB would like to remind the users that the period for industry feedback on the [DSB's UK ToTV/uToTV draft specification](#) closes at 5pm UTC on Wednesday 6 March 2019. Please email any feedback to DSB Secretariat secretariat@anna-dsb.com.

Also please note that the DSB now has two further updates available:

1. JSON schema for ToTV version 2 record is now available on GitHub [here](#).
2. A related FAQ document, with collated user queries is now available on the DSB's website – please see [here](#).

Regards,
DSB Technical Support Team

Subject: RE: NOTIFICATION: Introduction of DSB's UK ToTV/uToTV service [in the event of a no-deal Brexit] - Draft specification is available

Dear All,

The draft specification for the DSB's UK ToTV/uToTV service is now available at <https://www.anna-dsb.com/download/dsbs-uk-totv-utotv-service/>.

Users are kindly requested to provide feedback by close of business Wednesday 6 March 2019.

As a reminder, given the short implementation timeframe, the DSB will begin the development of its new UK ToTV/uToTV service immediately, based on this draft specification.

Whilst the DSB has made every effort to engage with industry to obtain feedback before forming the listed assumptions, please note that significant deviations from the key assumptions may impact affect the implementation timeline.

Best Regards,
DSB Technical Support Team

Subject: NOTIFICATION: Introduction of DSB's UK ToTV/uToTV service [in the event of a no-deal Brexit]

NOTIFICATION: Introduction of DSB's UK ToTV/uToTV service [in the event of a no-deal Brexit]

Notification Details

In the event of the UK leaving the EU without an implementation period: following the [FCA statement](#) published on 1st February 2019, that the FCA will be replacing the ESMA FIRDS Reference Data system for the UK, the DSB will be adding support for FCA FIRDS contingent on the FCA going live on 1st April 2019.

Approach

The DSB's UK ToTV/uToTV service is intended to support users' Brexit contingency planning efforts and has been designed to ensure that only those users who require UK ToTV/uToTV data will need to augment their integration models with the DSB. The DSB's UK ToTV Production service will replicate current ToTV/uToTV processes, with data to be sourced from the FCA instead of ESMA.

The DSB's UK ToTV/uToTV service will be launched in the event the UK leaves the EU without an implementation period i.e. in the scenario of a no-deal Brexit. In the event that an implementation period is agreed that allowed UK trading venues and SIs to continue to be subject to the EU transaction reporting regime and continue to report data to ESMA FIRDS, no changes will be introduced to the DSB's existing ToTV/uToTV service on the 1st April 2019.

Scope

- UK ToTV/uToTV will have the same scope as the current ESMA driven data made available in the DSB, i.e. the initial, Brexit contingency based DSB service will not be setting UK ToTV for OTC derivatives (details about the current EU based ToTV/uToTV are [available here](#))
- UK ToTV records will have transparency when FCA will make it available ([FCA to publish details by the end of February 2019](#)). The DSB will provide users with further information about its approach, once it has had a chance to evaluate the updates provided by FCA.

Timeline

- **27 February 2019** – Draft specification for the DSB's UK ToTV/uToTV service published. Users are requested to provide feedback by 6 March
- **6 March 2019** – End Date to provide feedback on the draft specification for the new DSB UK ToTV/uToTV service. Given the short implementation timeframe, the DSB will begin the development of its new UK ToTV/uToTV service based on the draft specification
- **11 March 2019** – Final specification for the DSB's UK ToTV/uToTV service published
- **18 March 2019** – The new DSB UK ToTV/uToTV service available in UAT for user testing
- **1 April 2019** – Date consistent with the FCA going live on 1 April 2019 in the event of a no-deal Brexit: New DSB's UK ToTV/uToTV service goes live in Production
