Dear Users,

This is to inform you that the **UAT Disaster Recovery Invocation** has been successfully implemented as scheduled.

DSB UAT API users who are experiencing any re-connection issues after the **UAT Disaster Recovery Invocation** are advised to reach out to technical.support@anna-dsb.com so that the issue can be investigated immediately.

Regards,
DSB Technical Support Team

Audience: All DSB UAT Users

Notification details:

The purpose of this notification is to inform DSB UAT users that the **UAT Disaster Recovery Invocation** will proceed as scheduled, on 16th July 2021.

UAT Disaster Recovery Invocation Timeline:

Invocation is scheduled to start **Friday 16th July 2021 23:55:00 PM UTC** and is expected to finish **Saturday 17th July 2021 04:00 AM.**

The DSB will provide periodic updates regarding the status of the UAT DR event.

Impact to users:

In relation to this activity, the DSB UAT services will be unavailable for the additional duration UAT Disaster Recovery Invocation period.

This does NOT affect the UAT maintenance window which is scheduled every week from 00:30 AM UTC Sunday to 12:30 PM UTC Sunday.

Action Required:

DSB UAT API users who are experiencing any re-connection issues after the **UAT Disaster Recovery Invocation** are advised to reach out to technical.support@anna-dsb.com so that the issue can be investigated immediately.

Dear Users,

As a reminder, the DSB UAT-DR environment will no longer be available for functionality testing as of end-of-day tomorrow, Friday 18th June. **Connectivity testing** will remain available until 2nd July 2021; ahead of the upcoming UAT disaster recovery invocation scheduled 16th July 2021 until 10th September 2021.

If you have not already undertaken your connectivity & functionality testing, please find more details on UAT-DR test here, which includes timelines as well as required user actions to ensure continued access to the DSB's UAT environment (next release).

Please do let us know if you have any questions, happy to help.

Regards,
DSB Technical Support Team

Dear Users,

As a reminder, ahead of the upcoming DSB UAT-DR test, scheduled 16th July 2021 until 10th September 2021, the DSB has invited all DSB UAT users to participate in connectivity and functionality testing to ensure connectivity to the DR region. Please find the more details on UAT-DR test here, which includes timelines as well as required user actions to ensure continued access to the DSB's UAT environment (next release).

Please note: Deadline for undertaking the connectivity and functionality test is 18th June 2021.
Please let us know if you have any questions.

Regards,
DSB Technical Support Team

NOTIFICATION: DSB UAT Inter-Region Disaster Recovery Testing

Dear User,

Following discussions with the DSB's Technology Advisory Committee (TAC) in March 2019 (here), the DSB proposed that disaster recovery testing will be conducted in an inter-region manner with its users. This programme incorporates several phases, beginning with work to ensure all client types can route to and integrate with the DSB's UAT environment in the DR availability zone, located in North America. Undertaking this testing will ensure your ability to maintain UAT service during the DR period.

The DSB reached out to its users in September 2019 (here and reminder here), to request assistance with the disaster recovery testing activities. Following the April 2021 TAC meeting, the TAC has approved the UAT-DR test to be undertaken in Q3 2021. Please find the more details on the UAT-DR test here, which includes timelines as well as required user actions to ensure continued access to the DSB's UAT environment (next release).

Please let us know if you have any questions.

Regards,
DSB Technical Support Team
