16 February 2022

Informational Notice: UAT REST API 401 errors when sending create and search requests between 11:44 AM UTC and 8:32 PM UTC February 16th 2022

Audience: **DSB UAT REST API Users**

Notification details:
This is an informational notice to those UAT REST API users who received **"401 Authentication required"** errors when sending create and search requests between 11:44 AM UTC and 8:32 PM UTC February 16th 2022 via the DSB UAT REST API service. Please note that the 401 error is only being encountered by UAT REST API

users and was brought about by a change in UAT today in which the related notification can be found [here.](#) The DSB has made a consensus to rollback the said changes to bring the UAT REST API service back to a working state. The rollback is currently in progress and DSB will provide an update on the status by 10:30 PM UTC 16th February 2022.

The DSB would like to apologise for any inconvenience this may have caused.

The DSB is currently investigating the root cause of this issue, if further assistance or clarification is needed regarding this notification please revert back to us and we will respond accordingly.

Regards,
DSB Technical Support Team
