

## NOTIFICATION: DSB REST API Component Update

### Audience: REST API Users

#### Notification details:

The purpose of this notification is to inform DSB REST API users that the DSB will be making changes to the Authentication of the DSB REST API service, this is to ensure that we are adhering to RFC-7617 standards. Please note that the change has been reviewed and approved by the DSB's Technology Advisory Committee (**TAC**). This is documented on slides 20 and 21 of the TAC report which can be viewed [here](#)

Release Schedule	
UAT environment	24th September 2022
UAT2 environment	2nd October 2022
Production environment	3rd October 2022 Production tentative schedule*

#### Impact to users:

- Users that do not already adhere to RFC-7617 will not be able to send REST API requests if they do not update their authentication method.

#### Action Required:

- Users who do not already adhere to RFC-7617 must update their Authentication header. You may refer to section 2.1 of the REST RoE for the authentication changes. The latest REST RoE can be found [here](#).
