

Dear Users,

This has been completed in **UAT** environment.

Please visit the [2022 November Release](#) page on the DSB website for information about this release. The **2022 November Release** page includes Milestones and Change Details.

Action Required:

DSB UAT API users who are experiencing any connectivity issues are advised to reach out to technical.support@anna-dsb.com so that the issue can be investigated immediately.

Regards,
DSB Technical Support Team

18 July 2022

NOTIFICATION: DSB REST API Component Update

Audience: REST API Users

Notification details:

The purpose of this notification is to inform DSB REST API users that the DSB will be making changes to the Authentication of the DSB REST API service, this is to ensure that we are adhering to RFC-7617 standards. Please note that the change has been reviewed and approved by the DSB's Technology Advisory Committee (**TAC**). This is documented on slides 20 and 21 of the TAC report which can be viewed found [here](#).

Release Schedule	
UAT environment	6th August 2022
UAT2 environment	5th November 2022
Production environment	6th November 2022

Impact to users:

- Users that do not already adhere to RFC-7617 will not be able to send REST API requests if they do not update their authentication method.

Action Required:

- Users who do not already adhere to RFC-7617 must update their Authentication header. You may refer to section 2.1 of the REST RoE for the authentication changes. The latest REST RoE can be found [here](#).
