

Dear Users,

The purpose of this notification is to remind DSB users that we will be proceeding with the releases scheduled this coming weekend, 29th January 2023 as detailed in the [2023 January First Release](#) page on the DSB's website.

UAT2 Implementation Timeline:

Early Weekend Maintenance Schedule for 28th January 2023: 12:00 AM UTC Saturday and will finish at 12:30 PM UTC Sunday 29th January 2023.

Production Implementation Timeline:

Standard Maintenance Window: Sunday 29th January 2023: 00:30 AM - 12:30 PM UTC

Regards,

DSB Technical Support Team

Dear Users,

After recent feedback from the DSB's Technology Advisory Committee (TAC), the [product template release](#)¹, planned for Sunday 13th November 2022, has been postponed. The rationale to postpone was based on feedback from a DSB user that they were unable to accurately assess the impact of the release from the technical specifications, published on 20th July, until the publication of the JSON templates at the start of UAT on 24th September. The user felt there was insufficient time to undertake the changes.

Whilst almost all users of the DSB were ready for the release, the DSB is mindful that the impact of a delay in this specific case is minor: the delay will not impact the UPI implementation timelines nor any other regulatory or industry milestones.

The user feedback has highlighted a potential improvement to the DSB's notification protocol in order to provide additional transparency about non-backwardly compatible changes. The DSB will discuss with the TAC whether for future releases that are non-backwardly compatible, the DSB should publish the JSON templates earlier than at the start of UAT.

The revised date for the product template release will be Sunday 29th January 2023.

Please note that the [GUI release](#)² also planned for the 13th November 2022, is unrelated to the product template changes and will proceed as planned.

The GUI enhancements are being introduced to improve user experience. Changes include:

- Improvement in look and feel by updating the colour scheme to be in line with the DSB Marketing website
- Removing the login pop-up as login is on the front page
- Select between Create, Search, Product Definitions, FAQ, Notifications, DSB News functionality at the top of the page
- The introduction of a Select All checkbox in the Properties dropdown
- Reset and Change password criteria for special character is marked red when the password entered has a space

UAT2 Implementation Timeline:

Early Weekend Maintenance Schedule for 12th November 2022: 12:00 AM UTC Saturday and will finish at 12:30 PM UTC Sunday 13th November 2022.
