

17th April 2023

Notification: 2023 April template updates in UPI UAT environment

Dear User,

Further to the notification on 13 February advising users that the UPI JSON templates were available, this notification is to advise of minor updates to some of the UPI and OTC ISIN JSON templates in [UPI UAT Github](#)¹. These updates keep templates in line with recent releases in the OTC ISIN environment and additional functionality regarding alternate underlying identifiers.

Additionally, the “JSON” folder name in UPI UAT Github has been renamed to “OTC-Products”.

Please visit the [release page](#)² on the DSB website for further information.
