CHANGE REQUEST FORM

	Version	State	Author	Date	Description
	1	DRAFT	Marlowe Surop	07 Feb 2020	Initial Document
Ī	1	FINAL	Marlowe Surop	16 July 2020	Updated to FINAL

Every ISIN successfully created is ever unique in DSB database. However, a certain user has raised their concern as they would like to rely on the "LastUpdateDateTime" and to know when a certain record has changed. "LastUpdateDateTime" is one of the ISIN record attributes, serves as the timestamp that indicates when a certain record was created or last updated if there have been any updates. Current state in all record templates, ISIN record does not include "LastUpdateDateTime" attribute as one of the required fields in DSB's JSON schema as illustrated below: 3.	Title	Set LastUpdateDateTime ISIN attribute to "Required" in all record templates						
"LastUpdateDateTime" also to know when a certain record has changed. "LastUpdateDateTime" is one of the ISIN record attributes, serves as the timestamp that indicates when a certain record was created or last updated if there have been any updates. Current state in all record templates, ISIN record does not include "LastUpdateDateTime" attribute as one of the required fields in DSB's JSON schema as illustrated below: }, "required": ["ISIN", "status"], "additionalProperties": false In order for each ISIN created to be meaningful, "LastUpdateDateTime" ISIN record attribute should be included to "Required" in JSON schema in all record templates for all asset classes. This is in response to the email inquiry received from a DSB user (November 01, 2017). Terms of Reference The impact of this change is for all templates in all asset classes (i.e., Rates, Credit, Equity, Commodities, Foreign_Exchange and Other). DSB-054 has no dependencies to any existing JIRA ticket.	Background				DSB-054

Required fields in all DSB record templates.		Require	ed fields in all DSB record templates.					
Change All in-scope record templates for all asset classes with ISIN record attribute "LastUpdateDateTime" needs								
Details to be included to "Required" as illustrated below. Moreover, its logic or functionality remains unchanged.	Details to be included to "Required" as illustrated below. Moreover, its logic or functionality rema							

```
},
                    "required": [
                      "ISIN",
                      "Status",
                      "LastUpdateDateTime"
                    ],
                    "additionalProperties": false
                  },
Change Impact
                 The change will impact all existing record templates for all asset classes (i.e., Rates, Credit, Equity,
                 Commodities, Foreign_Exchange and Other).
Error Message
                 Once the required change is implemented in DSB JSON schema, there is no error message that is expected
                 to happen.
Backward
                 This is an enhancement in all existing templates and will not have an impact on any existing ISINs since all
Compatibility
                 previously created ISINs have "LastUpdateDateTime" record attribute which served as a fingerprint or
                 timestamp as to when the ISIN was created or last updated if there have been any updates.
Use Cases
                 Valid ISIN record for all affected templates based on each ISIN status:
                       RECORD
                                                        Status
                                                                  Status Reason
                                     Identification
                                                                                   Last Update DateTime

INTERNAL INFORMATION

Title	Description
MIS Requirements	This is an enhancement of ISIN record attribute "Last Update Date Time" in all DSB templates which already forms part of anna-dsb-fipro-log .
