CHANGE REQUEST FORM

Version	State	Author	Date	Description
1	Draft	J. Lim	15 Mar 2021	Initial Document
2	Draft	J. Lim	30 Mar 2021	Updated Term of reference, GUI details and additional information section
3	Draft	J. Lim	16 Apr 2021	Updated TOR, Template Layout, Attribute data dictionary, comments, references
4	Draft	J. Lim	21 Jul 2021	Updated attribute data dictionary and reference

<table>
<tr><th>Title</th><th colspan="3">RATES SWAP Cross Currency Zero Coupon Template Definition</th></tr>
<tr><td rowspan="5">Background</td><td rowspan="5">The following CRF presents a specification for the generation and retrieval of a Unique Product Identifier for the following product:

• Rates : Swap : Cross_Currency_Zero_Coupon</td><td>DSB-ID</td><td>UPI-0088</td></tr>
<tr><td>Type</td><td>New Template</td></tr>
<tr><td>Owner</td><td>J.Lim</td></tr>
<tr><td>Version</td><td>4</td></tr>
<tr><td>State</td><td>Draft</td></tr>
<tr><td colspan="4">Terms of Reference</td></tr>
<tr><td>Scope</td><td colspan="3">• This CRF specifies the product definition required for the generation / retrieval of a UPI only.
• This CRF covers both the input (Request) and output (Record) templates.
• Support for local jurisdiction / alternate underlier identifier input is currently out of scope.
• Support for CFI 2019 values is currently out of scope.</td></tr>
<tr><td>Requirements</td><td colspan="3">• The product definition will conform to ISO 4914 (UPI).
• Where possible, the product definition is to be based on the attributes, values and behaviour of the equivalent OTC ISIN.
• The product definition will return a product short name (FISN).
• All UPI records stored on the DSB RDL will include the ISO 10962 (CFI) code associated with the UPI along with an equivalent text value for all attributes that are included in the definition of the CFI.</td></tr>
<tr><td>Dependencies</td><td colspan="3">• This specification is dependent on final sign-off of the ISO 4914 (UPI) specification.
• This specification is dependent on PC approval for the use of the OTC ISIN definitions as a basis for the UPI.
• This specification is dependent on PC approval for the inclusion of ISO 4914 (UPI) conditional attributes.
• This specification is dependent on TAC Approval for the DSB approach to ISO 10962 (CFI:2019) migration.
• This specification is dependent on the provision of a human-readable alias for the primary underlier for inclusion in the Short Name (FISN) and a human-readable alias for the Contract Specification.
• The format of the Short Name is dependent upon the outcome of the ISO 18774 (FISN) systematic review.</td></tr>
<tr><td>Assumptions</td><td colspan="3">• This specification assumes that, unless stated, all values and behaviours are based on those of the equivalent OTC ISIN product definition.
• This specification assumes that no input values are to be defaulted by the system.
• This specification is based on the current ISO 4914 (UPI) specification (CD) – including attributes that are not currently supported by the equivalent OTC ISIN.
• This specification is based on the DSB’s current equivalent OTC ISIN product definition.
• This specification is based on the attributes and values defined in ISO 10962 (CFI:2015).
• In order to provide an example Short Name, this specification defines a format for this attribute that may not conform to the eventually agreed FISN format for the UPI. This specification assumes that the Short Name is defined using the same attributes (where available) as the OTC ISIN Short Name.
• Where possible, this specification derives GUI details from the ISO 4914 (UPI) specification for attributes that are not included in the current OTC ISIN product definition.
• The display information in the GUI for the existing attributes (and values) are taken from the OTC ISIN. If such information contains an "ISIN" in the description, replace the value into "UPI".</td></tr>
</table>

	• The specification for UPI does not include expiry date as part of the attributes, hence "expired" status does not apply.

Notional Schedule	ISO 10962 Classification of financial instruments (CFI code)	Enums *[Constant; Accreting; Amortizing; Custom]*
Delivery Type	ISO 20022 FinancialInstrumentReportingReferenceDataReportV01	Enums *[CASH; PHYS]*
CFI Delivery Type	ISO 10962 Classification of financial instruments (CFI code)	Enums *[Cash; Physical]*

Normalization

1. Reference Rate Term Value and Reference Rate Term Unit

- If Reference Rate Term Unit = "DAYS" and Reference Rate Term Value is divisible by 7, record it in weeks

Reference Rate Term Value	7	→	Reference Rate Term Value	1
Reference Rate Term Unit	DAYS		Reference Rate Term Unit	WEEK

- If Reference Rate Term Unit = "MNTH" and Reference Rate Term Value is divisible by 12, record it in years

Reference Rate Term Value	12	→	Reference Rate Term Value	1
Reference Rate Term Unit	MNTH		Reference Rate Term Unit	YEAR

2. Notional Currency and Other Notional Currency

For cross currency, the input notional and other notional currency submitted by users need to normalize to ensure that same UPI is returned for a same set of attributes.

- Order the "Notional currency" and "Other Notional Currency" alphabetically.
- If the "Notional Currency" is first alphabetically, then record it as "Notional Currency".
- If the "Notional Currency" is not first alphabetically, then record the fields as below:

Notional Currency	→	Other Notional Currency
Other Notional Currency	→	Notional Currency

Derivation

This section provides additional details to the derivation logic specified in the Template Layout sections (above).

Classification Type

Concatenation of the following attributes/values:

- Instrument Type: "S"
- Asset Class: "R"
- Underlying Asset Type: "Z"
- Notional Schedule: from Request.Notional Schedule…
  - *Constant* → *C*
  - *Accreting* → *I*
  - *Amortizing* → *D*
  - *Custom* → *Y*
- Single or Multi-Currency: "C"
- Delivery Type: from Request.Delivery Type…
  - *CASH* → *C*
  - *PHYS* → *P*

E.g.: "SRZCCP"

Short Name

Concatenation of the following attributes/values:

i. Issuer Name: "NA/"
ii. Instrument Type: "Swap" (fixed value)
iii. Underlying Asset Type: "Zero Cpn" (fixed value)
iv. Notional Currency: e.g., JPY – from ISO 4217 output value
v. Other Notional Currency: e.g., USD – from ISO 4217 output value

E.g.: "NA/Swap Zero Cpn JPY USD".
Note: The Short Name is based on the OTC ISIN that excludes the following fields:

		- *Expiry Date*
	CFI Delivery Type	Derived from the input Delivery Type… • CASH → "Cash" • PHYS → "Physical"
GUI Details	The following section provides display information for any attributes (and values) that are not included in the related OTC ISIN definition.	

Attribute	Display Name	Tool Tip (and • *value elaboration*)
Underlier ID	Underlier ID	An identifier that can be used to determine the asset(s), index (indices) or benchmark underlying a contract or, in the case of a foreign exchange derivative, identification of the currency pair or index
Underlier ID Source	Underlier ID Source	The origin, or publisher, of the associated underlier ID.
UPI	Identification	Unique Product Identifier (ISO 4914).
CFI Delivery Type	CFI Delivery Type	The Delivery Type as defined by CFI code: ISO 10962 • *As defined by CFI Code: ISO 10962*

Additional Information

Reference	References to external documents can be found on the DSB website at this address [https://www.anna-dsb.com/upi-external-reference-documents/].
Comments	• Text values in the Short Name are taken from "ISO Abbrev w acronyms-Final_v0.5.5.FINAL." • Existing OTC ISIN product definition methodology of the Short Name abbreviation (Issuer of TV + "/" + Instrument Type) for Equity Asset Class has "**NA/Swaps**" whereas Rates has "**NA/Swap**".
