Derivatives Service Bureau (UPI) CHANGE REQUEST FORM

Version	State	Author	Date	Description
1	Draft	M. Surop	26 March 2021	Initial Document
2	Draft	M. Surop	21 April 2021	Updated ToR & GUI details, inserted Attribute Data Dictionary
3	Draft	M. Surop	28 June 2021	Updated error message for ISIN validation
4	Draft	M. Surop	19 July 2021	Removed active hyperlinks in Data Dictionary; Amended References section with standard text; Removed Short Name comment in the Comment section.
5	Draft	M. Surop	24 Sept 2021	Updated error message for ISIN validation

Title	EQTY SWAP Parameter Return Dividend Single Name Template Definition						
Background	The following CRF presents a specification for the generation and retrieval of a Unique Product Identifier for the following product:	DSB-ID	UPI-0110				
		Туре	New Template				
	Equity : Swap : Parameter_Return_Dividend_Single_Name	Owner	M. Surop				
		Version	5				
		State Draft					
Terms of Referenc	e						
Scope	 This CRF specifies the product definition required for the generation / retrieval This CRF covers both the input (Request) and output (Record) templates. Support for local jurisdiction / alternate underlier identifier input is currently ou Support for CFI 2019 values is currently out of scope. 	-					
Requirements	 The product definition will conform to ISO 4914 (UPI). Where possible, the product definition is to be based on the attributes, values and behaviour of the equivalent OTC ISIN. The product definition will return a product short name (FISN). All UPI records stored on the DSB RDL will include the ISO 10962 (CFI) code associated with the UPI along with an equivalent text value for all attributes that are included in the definition of the CFI. 						
Dependencies	 This specification is dependent on final sign-off of the ISO 4914 (UPI) specification. This specification is dependent on PC approval for the use of the OTC ISIN definitions as a basis for the UPI. This specification is dependent on PC approval for the inclusion of ISO 4914 (UPI) conditional attributes. This specification is dependent on TAC Approval for the DSB approach to ISO 10962 (CFI:2019) migration. This specification is dependent on the provision of a human-readable alias for the primary underlier for inclusion in the Short Name (FISN) and a human-readable alias for the Contract Specification. The format of the Short Name is dependent upon the outcome of the ISO 18774 (FISN) systematic review. 						
Assumptions	This specification assumes that, unless stated, all values and behaviours are based on those of the equivalent OTC ISIN product definition. This specification assumes that no input values are to be defaulted by the system. This specification is based on the current ISO 4914 (UPI) specification (CD) – including attributes that are not currently supported by the equivalent OTC ISIN. This specification is based on the DSB's current equivalent OTC ISIN product definition. This specification is based on the attributes and values defined in ISO 10962 (CFI:2015). In order to provide an example Short Name, this specification defines a format for this attribute that may not conform to the eventually agreed FISN format for the UPI. This specification assumes that the Short Name is defined using the same attributes (where available) as the OTC ISIN Short Name. Where possible, this specification derives GUI details from the ISO 4914 (UPI) specification for attributes that are not included in the current OTC ISIN product definition.

Product Definition								
Attributes	See Template Layout (above).							
Validation	 Underlier ID The following validation will apply for Underlying Instrument ISIN: The input text by user must be in 12 characters (2 alpha, 9 alphanumeric, 1 numeric). The input text must not have a prefix of "QZ" or "EZ". A syntactic validation is being performed to confirm an ISIN when hitting create. If the input ISIN is less or more than 12 characters and/or is not aligned with the above pattern before hitting create, an error message will apply "Value must match the pattern ^(?!(EZ QZ))[A-Z]{2}[A-Z0-9]{9}[0-9]\$." If the input ISIN is not aligned with the above pattern after hitting create, an error message will apply "Error: /Attributes/UnderlierID/0: ECMA 262 regex "^(?!(EZ QZ))[A-Z]{2}[A-Z0-9]{9}[0-9]\$" does not match input string "[user input]". If the input ISIN is aligned with the pattern criteria but ISIN value does not conform with syntactic validation, an error message will apply "Error: ISIN/s must be valid". 							
Normalization	Not required.							
Attribute Data	This section provides the exact reference or source of the attribute.							
Dictionary	Full Name	Source	Туре					
	Delivery Type	ISO 20022 FinancialInstrumentReportingReferenceDataReportV01	Enums [CASH, PHYS, OPTL]					
	CFI Delivery Type	ISO 10962 Classification of financial instruments (CFI code)	Enums [Cash, Physical, Elect at Settlement]					
	Max of 12 text (pattern) [A-Z] – firsts 2 characters							

					[A-Z], [0-9] – Next 9 characters [0-9] – Last value is based on ISIN calculation				
This section provides additional details to the derivation logic specified in the Template Layout sections (above).
