4	Draft	J. Lim	21 Jul 2021	Updated attribute data dictionary and reference

Title	EQUITY SWAP Price Return Basic Performance Single Name CFD Template Definition		
Background	<p>The following CRF presents a specification for the generation and retrieval of a Unique Product Identifier for the following product:</p> <ul style="list-style-type: none"> Equity : Swap : Price_Return_Basic_Performance_Single_Name_CFD 	DSB-ID	UPI-0114
		Type	New Template
		Owner	J.Lim
		Version	4
		State	Draft
Terms of Reference			
Scope	<ul style="list-style-type: none"> This CRF specifies the product definition required for the generation / retrieval of a UPI only. This CRF covers both the input (Request) and output (Record) templates. Support for local jurisdiction / alternate underlier identifier input is currently out of scope. Support for CFI 2019 values is currently out of scope. 		
Requirements	<ul style="list-style-type: none"> The product definition will conform to ISO 4914 (UPI). Where possible, the product definition is to be based on the attributes, values and behaviour of the equivalent OTC ISIN. The product definition will return a product short name (FISN). All UPI records stored on the DSB RDL will include the ISO 10962 (CFI) code associated with the UPI along with an equivalent text value for all attributes that are included in the definition of the CFI. 		
Dependencies	<ul style="list-style-type: none"> This specification is dependent on final sign-off of the ISO 4914 (UPI) specification. This specification is dependent on PC approval for the use of the OTC ISIN definitions as a basis for the UPI. This specification is dependent on PC approval for the inclusion of ISO 4914 (UPI) conditional attributes. This specification is dependent on TAC Approval for the DSB approach to ISO 10962 (CFI:2019) migration. This specification is dependent on the provision of a human-readable alias for the primary underlier for inclusion in the Short Name (FISN) and a human-readable alias for the Contract Specification. The format of the Short Name is dependent upon the outcome of the ISO 18774 (FISN) systematic review. 		
Assumptions	<ul style="list-style-type: none"> This specification assumes that, unless stated, all values and behaviours are based on those of the equivalent OTC ISIN product definition. This specification assumes that no input values are to be defaulted by the system. This specification is based on the current ISO 4914 (UPI) specification (CD) – including attributes that are not currently supported by the equivalent OTC ISIN. This specification is based on the DSB's current equivalent OTC ISIN product definition. This specification is based on the attributes and values defined in ISO 10962 (CFI:2015). In order to provide an example Short Name, this specification defines a format for this attribute that may not conform to the eventually agreed FISN format for the UPI. This specification assumes that the Short Name is defined using the same attributes (where available) as the OTC ISIN Short Name. Where possible, this specification derives GUI details from the ISO 4914 (UPI) specification for attributes that are not included in the current OTC ISIN product definition. The display information in the GUI for the existing attributes (and values) are taken from the OTC ISIN. If such information contains an "ISIN" in the description, replace the value into "UPI". 		

	<ul style="list-style-type: none"> The specification for UPI does not include expiry date as part of the attributes, hence "expired" status does not apply.

Product Definition			
Attributes	See Template Layout (above).		
Validation	<p>1. Underlier ID The following validation will apply for Underlier ID Source [ISIN]:</p> <ul style="list-style-type: none"> The input text by user must be in 12 characters (2 alpha, 9 alphanumeric, 1 numeric). The input text must not have a prefix of "QZ" or "EZ". A syntactic validation is being performed to confirm an ISIN when hitting create. If the input ISIN is less or more than 12 characters and/or is not aligned with the above pattern before hitting create, an error message will apply "Value must match the pattern <code>^(?!([EZ]QZ))[A-Z]{2}[A-Z0-9]{9}[0-9]\$.</code>" If the input ISIN is not aligned with the above pattern after hitting create, an error message will apply "Error: /Attributes/UnderlierID: ECMA 262 regex <code>\"^?!([EZ]QZ))[A-Z]{2}[A-Z0-9]{9}[0-9]\$</code>" does not match input string "[user input]". If the input ISIN is aligned with the pattern criteria but ISIN value does not conform with syntactic validation, an error message will apply "Error: ISIN/s must be valid". 		
Attribute Data Dictionary	This section provides the exact reference or source of the attribute.		
	Full Name	Source	Type
	Delivery Type	ISO 20022 FinancialInstrumentReportingReferenceDataReportV01	Enums [CASH; PHYS; OPTL]
	CFI Delivery Type	ISO 10962 Classification of financial instruments (CFI code)	Enums [Cash; Physical; Elect at Settlement]
	Underlying Instrument ISIN	Not Available	Max of 12 text (pattern) [A-Z] – firsts 2 characters [A-Z], [0-9] – Next 9 characters [0-9] – Last value is based on ISIN calculation

Normalization	<ul style="list-style-type: none"> Not Required 			
Derivation	This section provides additional details to the derivation logic specified in the Template Layout sections (above).			
	Classification Type	Concatenation of the following attributes/values: <ul style="list-style-type: none"> Instrument Type: "S" Asset Class: "E" Underlying Asset Type: "S" Return or Payout Trigger: "C" Not applicable/undefined: "X" Delivery Type: from Request.Delivery Type... <ul style="list-style-type: none"> CASH → C PHYS → P OPTL → E E.g.: "SESCXC"		
	Short Name	Concatenation of the following attributes/values: <ul style="list-style-type: none"> Issuer Name: "NA/" Instrument Type: "Swaps" (fixed value) Underlying Asset Type: "Sgle Stk" (fixed value) Return or Payout Trigger: "CFD" (fixed value) E.g.: "NA/Swaps Sgle Stk CFD". <i>Note: The Short Name is based on the OTC ISIN that excludes the following fields:</i> <ul style="list-style-type: none"> Notional Currency Expiry Date 		
CFI Delivery Type	Derived from the input Delivery Type... <ul style="list-style-type: none"> CASH → "Cash" PHYS → "Physical" OPTL → "Elect at Settlement" 			
GUI Details	The following section provides display information for any attributes (and values) that are not included in the related OTC ISIN definition.			
	Attribute	Display Name	Tool Tip (and • value elaboration)	
	Underlier ID	Underlier ID	An identifier that can be used to determine the asset(s), index (indices) or benchmark underlying a contract or, in the case of a foreign exchange derivative, identification of the currency pair or index	
	Underlier ID Source	Underlier ID Source	The origin, or publisher, of the associated underlier ID.	
	UPI	Identification	Unique Product Identifier (ISO 4914).	
	CFI Delivery Type	CFI Delivery Type	The Delivery Type as defined by CFI code: ISO 10962 <ul style="list-style-type: none"> As defined by CFI Code: ISO 1096 	
Additional Information				
Reference	References to external documents can be found on the DSB website at this address [https://www.anna-dsb.com/upi-external-reference-documents/].			
Comments	<ul style="list-style-type: none"> Text values in the Short Name are taken from "ISO Abbrev w acronyms-Final_v0.5.5.FINAL." Currently the system does not hold reference data to support the validation of the LEI or ISIN. This means that it is not possible to validate the existence or classification of the Underlier ID. In addition, this means that human-readable alias is not currently supported for inclusion in the Short Name attribute. Existing OTC ISIN product definition methodology of the Short Name abbreviation (Issuer of TV + "/" + Instrument Type) for Equity Asset Class has "NA/Swaps" whereas Rates has "NA/Swap".
