2	Draft	J. Lim	21 Jul 2021	Updated attribute data dictionary and reference

Title	FOREIGN EXCHANGE FORWARD Vol Var Template Definition			
<b>Background</b>	The following CRF presents a specification for the generation and retrieval of a Unique Product Identifier for the following product:		<b>DSB-ID</b>	<b>UPI-0152</b>
	<ul style="list-style-type: none"> <li><b>Foreign_Exchange : Forward : Vol_Var</b></li> </ul>		<b>Type</b>	New Template
			<b>Owner</b>	J.Lim
			<b>Version</b>	2
			<b>State</b>	Draft
<b>Terms of Reference</b>				
<b>Scope</b>	<ul style="list-style-type: none"> <li>This CRF specifies the product definition required for the generation / retrieval of a UPI only.</li> <li>This CRF covers both the input (Request) and output (Record) templates.</li> <li>Support for local jurisdiction / alternate underlier identifier input is currently out of scope.</li> <li>Support for CFI 2019 values is currently out of scope.</li> </ul>			
<b>Requirements</b>	<ul style="list-style-type: none"> <li>The product definition will conform to ISO 4914 (UPI).</li> <li>Where possible, the product definition is to be based on the attributes, values and behaviour of the equivalent OTC ISIN.</li> <li>The product definition will return a product short name (FISN).</li> <li>The product definition will support the entry of and/or access to all CFI attributes and names for the product.</li> </ul>			
<b>Dependencies</b>	<ul style="list-style-type: none"> <li>This specification is dependent on final sign-off of the ISO 4914 (UPI) specification.</li> <li>This specification is dependent on PC approval for the use of the OTC ISIN definitions as a basis for the UPI.</li> <li>This specification is dependent on PC approval for the inclusion of ISO 4914 (UPI) conditional attributes.</li> <li>This specification is dependent on TAC Approval for the DSB approach to ISO 10962 (CFI:2019) migration.</li> <li>This specification is dependent on the provision of a human-readable alias for the primary underlier for inclusion in the Short Name (FISN) and a human-readable alias for the Contract Specification.</li> <li>The format of the Short Name is dependent upon the outcome of the ISO 18774 (FISN) systematic review.</li> </ul>			
<b>Assumptions</b>	<ul style="list-style-type: none"> <li>This specification assumes that, unless stated, all values and behaviours are based on those of the equivalent OTC ISIN product definition.</li> <li>This specification assumes that no input values are to be defaulted by the system.</li> <li>This specification is based on the current ISO 4914 (UPI) specification (CD) – including attributes that are not currently supported by the equivalent OTC ISIN.</li> <li>This specification is based on the DSB's current equivalent OTC ISIN product definition.</li> <li>This specification is based on the attributes and values defined in ISO 10962 (CFI:2015).</li> <li>In order to provide an example Short Name, this specification defines a format for this attribute that may not conform to the eventually agreed FISN format for the UPI. This specification assumes that the Short Name is defined using the same attributes (where available) as the OTC ISIN Short Name.</li> <li>Where possible, this specification derives GUI details from the ISO 4914 (UPI) specification for attributes that are not included in the current OTC ISIN product definition.</li> <li>The display information in the GUI for the existing attributes (and values) are taken from the OTC ISIN. If such information contains an "ISIN" in the description, replace the value into "UPI".</li> <li>The specification for UPI does not include expiry date as part of the attributes, hence "expired" status does not apply.</li> </ul>

Product Definition			
<b>Attributes</b>	See Template Layout (above).		
<b>Validation</b>	1. Notional Currency and Other Notional Currency cannot be identical. If the following attributes have the same currency, an error message will apply "Error: Notional Currency and Other Notional Currency cannot be identical".		
<b>Attribute Data Dictionary</b>	This section provides the exact reference or source of the attribute.		
	<b>Full Name</b>	<b>Source</b>	<b>Type</b>
	Delivery Type	ISO 20022 FinancialInstrumentReportingReferenceDataReportV01	Enums [CASH; PHYS]
	CFI Delivery Type	ISO 10962 Classification of financial instruments (CFI code)	Enums [Cash; Physical]
	Notional Currency	ISO 4217 Currency Codes	Pattern: [A-Z]{3,3}
	Other Notional Currency		
Settlement Currency			
*The Delivery Type for Foreign Exchange Forward is based on the current DSB OTC ISIN and only supports CASH (Cash) and PHYS (Physical). Therefore, Non-deliverable value is not supported even if it is included in the ISO 10962 (CFI 2015).			
<b>Normalization</b>	1. <b>Notional Currency and Other Notional Currency</b> The input notional and other notional currency submitted by users need to normalize to ensure that same UPI is returned for a same set of attributes. <ul style="list-style-type: none"> <li>Order the "Notional currency" and "Other Notional Currency" alphabetically.</li> </ul>		

	<ul style="list-style-type: none"> <li>If the "Notional Currency" is first alphabetically, then record it as "Notional Currency".</li> <li>If the "Notional Currency" is not first alphabetically, then record the fields as below:</li> </ul> <table border="1" style="margin-left: 20px;"> <tr> <td>Notional Currency</td> <td>→</td> <td>Other Notional Currency</td> </tr> <tr> <td>Other Notional Currency</td> <td>→</td> <td>Notional Currency</td> </tr> </table>	Notional Currency	→	Other Notional Currency	Other Notional Currency	→	Notional Currency															
Notional Currency	→	Other Notional Currency																				
Other Notional Currency	→	Notional Currency																				
<b>Derivation</b>	<p>This section provides additional details to the derivation logic specified in the Template Layout sections (above).</p>
