CHANGE REQUEST FORM

Version	State	Author	Date	Description
1	Initial Draft	M. Surop	07 April 2021	Initial Document
2	Draft	M. Surop	19 July 2021	Removed active hyperlinks in Data Dictionary; Amended References section with standard text; Removed Short Name comment in the Comment section.

Title	FOREIGN EXCHANGE FORWARD Rolling Spot Template Definition		
Background	The following CRF presents a specification for the generation and retrieval of a Unique Product Identifier for the following product: • **Foreign_Exchange : Forward : Rolling_Spot**	**DSB-ID**	**UPI-0153**
		Type	New Template
		Owner	M. Surop
		Version	2
		State	Draft
Terms of Reference			
Scope	• This CRF specifies the product definition required for the generation / retrieval of a UPI only. • This CRF covers both the input (Request) and output (Record) templates. • Support for local jurisdiction / alternate underlier identifier input is currently out of scope. • Support for CFI 2019 values is currently out of scope.		
Requirements	• The product definition will conform to ISO 4914 (UPI). • Where possible, the product definition is to be based on the attributes, values and behaviour of the equivalent OTC ISIN. • The product definition will return a product short name (FISN). • The product definition will support the entry of and/or access to all CFI attributes and names for the product.		
Dependencies	• This specification is dependent on final sign-off of the ISO 4914 (UPI) specification. • This specification is dependent on PC approval for the use of the OTC ISIN definitions as a basis for the UPI. • This specification is dependent on PC approval for the inclusion of ISO 4914 (UPI) conditional attributes. • This specification is dependent on TAC Approval for the DSB approach to ISO 10962 (CFI:2019) migration. • This specification is dependent on the provision of a human-readable alias for the primary underlier for inclusion in the Short Name (FISN) and a human-readable alias for the Contract Specification. • The format of the Short Name is dependent upon the outcome of the ISO 18874 (FISN) systematic review.		
Assumptions	• This specification assumes that, unless stated, all values and behaviours are based on those of the equivalent OTC ISIN product definition. • This specification assumes that no input values are to be defaulted by the system. • This specification is based on the current ISO 4914 (UPI) specification (CD) – including attributes that are not currently supported by the equivalent OTC ISIN. • This specification is based on the DSB's current equivalent OTC ISIN product definition. • This specification is based on the attributes and values defined in ISO 10962 (CFI:2015). • In order to provide an example Short Name, this specification defines a format for this attribute that may not conform to the eventually agreed FISN format for the UPI. This specification assumes that the Short Name is defined using the same attributes (where available) as the OTC ISIN Short Name. • Where possible, this specification derives GUI details from the ISO 4914 (UPI) specification for attributes that are not included in the current OTC ISIN product definition. • The display information in the GUI for the existing attributes (and values) are taken from the OTC ISIN. If such information contains an "ISIN" in the description, replace the value into "UPI". • The specification for UPI does not include expiry date as part of the attributes, hence "expired" status does not apply.		

Request Template Layout

Section	Attribute	Format	Cat	Example Value	Validation / Derivation	Enum Source	Origin
Header Section	Asset Class	Set	M	Foreign_Exchange		CFI:2015 Char#2 (JF****)	ISIN

	Underlying Asset Type	String	D	Spot	Fixed value	CFI:2015 Char#3 (JFT***)	ISIN
	Return or Payout Trigger	String	D	Forward price of underlying instrument	Fixed value	CFI:2015 Char#5 (JF**F*)	ISIN
	CFI Delivery Type	String	D	Cash	See CRF (Derivations)	CFI:2015 Char#6 (JF****)	NEW

Product Definition	
Attributes	See Template Layout (above).
Validation	• Notional Currency and Other Notional Currency cannot be identical. If the following attributes have the same currency, an error message will apply: "Error: Notional Currency and Other Notional Currency cannot be identical."
Normalization	• **Notional Currency and Other Notional Currency** For currency pair, the input Notional Currency and Other Notional Currency submitted by users need to normalize to ensure that same ISIN is returned for a same set of attributes. • Order the "Notional currency" and "Other Notional Currency" alphabetically. • If the "Notional Currency" is first alphabetically, then record it as "Notional Currency". • If the "Notional Currency" is not first alphabetically, then record the fields as below: Notional Currency → Other Notional Currency Other Notional Currency → Notional Currency
Attribute Data Dictionary	This section provides the exact reference or source of the attribute.

Full Name	Source	Type
Delivery Type*	ISO 20022 FinancialInstrumentReportingReferenceDataReportV01	Enums [CASH, PHYS]
CFI Delivery Type*	ISO 10962 Classification of financial instruments (CFI code)	Enums [Cash, Physical]
Notional Currency		
Other Notional Currency	ISO 4217 Currency Codes	Pattern: [A-Z]{3,3}
Settlement Currency		
*The Delivery Type for Foreign Exchange Forward is based on the current DSB OTC ISIN and only supports CASH (Cash) and PHYS (Physical). Therefore, Non-Deliverable value is not supported even if it is included in the ISO 10962 (CFI 2015).		

Derivation	This section provides additional details to the derivation logic specified in the Template Layout sections (above).	

	Classification Type	Concatenation of the following attributes/values:
		• Instrument Type: "J"
		• Asset Class: "F"
		• Underlying Asset Type: "T"
		• Not applicable/undefined: "X"
		• Return or Payout Trigger: "F"
		• Delivery Type: from Request.DeliveryType…
		  - *CASH* → *C*
		  - *PHYS* → *P*
		E.g.: "JFTXFC"

	Short Name	Concatenation of the following attributes/values: • Issuer: "NA/" • Instrument Type: "Fwd" (fixed value) • Product: "Rlg Spot" (fixed value) • Notional Currency: e.g.: EUR – from ISO 4217 output value • Other Notional Currency: e.g.: USD – from ISO 4217 output value E.g.: "NA/Fwd Rlg Spot EUR USD" *Note: The Short Name is based on the OTC ISIN that excludes the following field:* - *Expiry Date*
	CFI Delivery Type	Derived from the input Delivery Type… • CASH → "Cash" • PHYS → P "Physical"
GUI Details	The following section provides display information for any attributes (and values) that are not included in the related OTC ISIN definition.	

Attribute	Display Name	Tool Tip (and • *value elaboration*)
Underlier ID	Underlier ID	An identifier that can be used to determine the asset(s), index (indices) or benchmark underlying a contract or, in the case of a foreign exchange derivative, identification of the currency pair or index
Underlier ID Source	Underlier ID Source	The origin, or publisher, of the associated underlier ID.
Other Underlier ID	Other Underlier ID	An identifier that can be used to determine the asset(s), index (indices) or benchmark underlying a contract or, in the case of a foreign exchange derivative, identification of the currency pair or index
Other Underlier ID Source	Other Underlier ID Source	The origin, or publisher, of the associated underlier ID.
UPI	Identification	Unique Product Identifier (ISO 4914).
CFI Delivery Type	CFI Delivery Type	The Delivery Type as defined by CFI code: ISO 10962 • *As defined by CFI Code: ISO 10962*

Additional Information

ISO 4914 Equivalence	**ISO 4914**		**Request Attribute**	**Record Attribute**
	Asset Class	M	Asset Class	Asset Class
	Instrument type	M	Instrument Type	Instrument Type
	Delivery type	M	Delivery Type	Delivery Type
				CFI Delivery Type

	Return, pricing method or payout trigger	M	Not Required	Return or Payout Trigger
	Settlement currency	M	Settlement Currency	Settlement Currency
	Underlier ID	C	Underlier ID	Notional Currency
			Other Underlier ID	Other Notional Currency
	Underlier ID source	C	Underlier ID Source	Not Required
			Other Underlier ID Source	
	Underlier type	M	Not Required	Underlying Asset Type
	Underlying contract tenor period*	C	Not Required	
	Underlying contract tenor period multiplier*	C	Not Required	

*Underlying Contract Tenor Period / Multiplier applies only to a derivative contract underlying another derivative. For this product, the underlying is a currency pair and so these attributes are not required.
