

Derivatives Service Bureau (UPI)
CHANGE REQUEST FORM

Version	State	Author	Date	Description
1	Draft	J. Lim	19 Apr 2021	Initial Document
2	Draft	J. Lim	31 May 2021	Update error message for ISIN and LEI validation
3	Draft	J. Lim	14 Jun 2021	Update error message for ISIN validation
4	Draft	J. Lim	30 Jun 2021	Update validation message
5	Draft	J. Lim	21 Jul 2021	Updated template layout, attribute section, attribute data dictionary, GUI details and reference

Title	Credit SWAP ABS Template Definition			
Background	<p>The following CRF presents a specification for the generation and retrieval of a Unique Product Identifier for the following product:</p> <ul style="list-style-type: none"> Credit : Swap : ABS 		DSB-ID	UPI-0193
			Type	New Template
			Owner	J.Lim
			Version	5
			State	Draft
Terms of Reference				
Scope	<ul style="list-style-type: none"> This CRF specifies the product definition required for the generation / retrieval of a UPI only. This CRF covers both the input (Request) and output (Record) templates. Support for local jurisdiction / alternate underlier identifier input is currently out of scope. Support for CFI 2019 values is currently out of scope. 			
Requirements	<ul style="list-style-type: none"> The product definition will conform to ISO 4914 (UPI). Where possible, the product definition is to be based on the attributes, values and behaviour of the equivalent OTC ISIN. The product definition will return a product short name (FISN). All UPI records stored on the DSB RDL will include the ISO 10962 (CFI) code associated with the UPI along with an equivalent text value for all attributes that are included in the definition of the CFI. 			
Dependencies	<ul style="list-style-type: none"> This specification is dependent on final sign-off of the ISO 4914 (UPI) specification. This specification is dependent on PC approval for the use of the OTC ISIN definitions as a basis for the UPI. This specification is dependent on PC approval for the inclusion of ISO 4914 (UPI) conditional attributes. This specification is dependent on TAC Approval for the DSB approach to ISO 10962 (CFI:2019) migration. This specification is dependent on the provision of a human-readable alias for the primary underlier for inclusion in the Short Name (FISN) and a human-readable alias for the Contract Specification. The format of the Short Name is dependent upon the outcome of the ISO 18774 (FISN) systematic review. 			
Assumptions	<ul style="list-style-type: none"> This specification assumes that, unless stated, all values and behaviours are based on those of the equivalent OTC ISIN product definition. This specification assumes that no input values are to be defaulted by the system. This specification is based on the current ISO 4914 (UPI) specification (CD) – including attributes that are not currently supported by the equivalent OTC ISIN. This specification is based on the DSB's current equivalent OTC ISIN product definition. This specification is based on the attributes and values defined in ISO 10962 (CFI:2015). In order to provide an example Short Name, this specification defines a format for this attribute that may not conform to the eventually agreed FISN format for the UPI. This specification assumes that the Short Name is defined using the same attributes (where available) as the OTC ISIN Short Name. Where possible, this specification derives GUI details from the ISO 4914 (UPI) specification for attributes that are not included in the current OTC ISIN product definition. 			

	<ul style="list-style-type: none"> The display information in the GUI for the existing attributes (and values) are taken from the OTC ISIN. If such information contains an "ISIN" in the description, replace the value into "UPI". The specification for UPI does not include expiry date as part of the attributes, hence "expired" status does not apply. The specification for underlying debt issuance tenor period/underlying debt issuance tenor period multiplier is subject for review and approval by CDIDE as part of ISO 4914 standard.

Product Definition	
Attributes	<p>See Template Layout (above).</p> <p>a) Underlier Type</p> <p>The Request template described in this document supports products that can be defined on the basis of more than one type of underlier. For this product, the user is asked to select one of the following:</p> <ul style="list-style-type: none"> Fixed Income Security Legal Entity <p>Once the Underlier Type is chosen, the user will be asked to select one of the Underlier ID Sources associated with that Underlier Type and enter the Underlier ID that matches the ID Source.</p> <p><i>* Please see Underlier Input Method Document (see Reference Section below) for further details.</i></p>
Validation	<p>See Request Template Layout (above).</p> <p>1. Underlier ID</p> <p>The following validation will be applied to Underlier ID based on the value selected on Underlier ID Source [LEI, ISIN].</p> <p>a. LEI</p> <ul style="list-style-type: none"> The input text by user must be in 20 characters (18 alphanumeric, 2 numeric). A syntactic validation is being performed to confirm LEI.

	<ul style="list-style-type: none"> If the input LEI is less or more than 20 characters and/or is not aligned with the above pattern before hitting create, an error message will apply "Value must match the pattern <code>^[A-Z0-9]{18}[0-9]{2}\$</code>". If the input LEI is not aligned with the pattern and conformed with the syntactic validation after hitting create, an error message will apply "Error: /Attributes/Underlying: instance failed to match exactly one schema (matched 0 out of 2)". <p>b. ISIN</p> <ul style="list-style-type: none"> The input text by user must be in 12 characters (2 alpha, 9 alphanumeric, 1 numeric). The input text must not have a prefix of "QZ" or "EZ". A syntactic validation is being performed to confirm an ISIN when hitting create. If the input ISIN is less or more than 12 characters and/or is not aligned with the above pattern before hitting create an error message will apply "Value must match the pattern <code>^(?! (EZ QZ))[A-Z]{2}[A-Z0-9]{9}[0-9]\$</code>". If the input ISIN is not aligned with the above pattern after hitting create, an error message will apply "If Error: /Attributes/Underlying: instance failed to match exactly one schema (matched 0 out of 2)". If the input ISIN is aligned with the pattern criteria but ISIN value does not conformed with syntactic validation, an error message will apply "Error: ISIN/s must be valid".

GUI Details	<p>The following section provides display information for any attributes (and values) that are not included in the related OTC ISIN definition.</p>			
	Attribute	Display Name	Tool Tip (and • value elaboration)	
	Underlier Type	Underlier Type	Indicates the type of underlying asset or entity on which the product is based.	
	Underlier ID	Underlier ID	An identifier that can be used to determine the asset(s), index (indices) or benchmark underlying a contract or, in the case of a foreign exchange derivative, identification of the currency pair or index	
	Underlier ID Source	Underlier ID Source	The origin, or publisher, of the associated underlier ID.	
	UPI	Identification	Unique Product Identifier (ISO 4914).	
	CFI Delivery Type	CFI Delivery Type	The Delivery Type as defined by CFI code: ISO 10962 • <i>As defined by CFI Code: ISO 10962</i>	
Additional Information				
Reference	<p>References to external documents can be found on the DSB website at this address [https://www.anna-dsb.com/upi-external-reference-documents/].</p>			
Comments	<ul style="list-style-type: none"> • Text values in the Short Name are taken from "ISO Abbrev w acronyms-Final_v0.5.5.FINAL." • Currently the system does not hold reference data to support the validation of the LEI or ISIN. This means that it is not possible to validate the existence or classification of the Underlier ID. In addition, this means that human-readable alias is not currently supported for inclusion in the Short Name attribute. • The Contract Specification only applies to Credit.Swap.Corporate; Credit.Swap.Municipal; Credit.Swap.Sovereign & Credit.Swap.Non_Standard and does not apply to Credit.Swap.Loan; Credit.Swap.ABS; Credit.Swap.Index; Credit.Swap.Index_Tranche; & Credit.Swap.Total_Return_Swap.

	Underlier sub-type (first level)	M	Underlying Issuer Type	Underlying Issuer Type
	Underlying Credit Index Series**	C	Not Required	
	Underlying Credit Index Version**	C	Not Required	
	Underlying Debt Issuance Tenor Period***	C	Not Required	
	Underlying Debt Issuance Tenor Period Multiplier***	C	Not Required	

*Standard Contract Specification does not apply for this product, refer to comments section above.

**Underlying Credit Index Series/Version applies only to an underlying Credit Index. For this product, the underlying is either a Legal Entity or Debt Instrument and so these attributes are not required.

***Dependent on ISO review and approval for the inclusion of Underlying Debt Issuance Tenor Period/Multiplier as ISO 4914 (UPI) Conditional attributes.
