1 INTRODUCTION

This document is designed to act as a manual for users to interpret the Product Definitions in the DSB UPI Service.

This document provides the user with the detailed description of the UPI Product Definition content such as attribute enumerations, validation, normalization, and derivation where applicable.

1.1 Associated Documentation

Each UPI Product Definition template links to reference documents where values will be maintained for the sake of consistency and ease of access e.g., Enumerations, Data Dictionary, Validation and Normalizations, etc.

These documents are made available for references as follows:

- UPI Enumerations Document can be found in the Enumerations section on the [DSB website](#).
- UPI Product Definition Data Dictionary can be found in the Other Documents section on the [DSB website](#).
- UPI Product Definition Validations and Normalizations Document can be found in the Other Documents section on the [DSB website](#).
- UPI Underlier Input Method can be found in the Other Documents section on the [DSB website](#).
- Best Practice Guidelines and FAQs can be found in the Other Documents section on the [DSB website](#).
- Links to the relevant JSON templates can be found in the GitHub Environment Section on the [DSB website](#).

5 SUPPLEMENTARY INFORMATION

5.1 Best Practice Guidelines

The DSB supports the generation of UPIs for several types of FX Forwards such as Non-Deliverable Forward (NDF) where one or both currencies are non-deliverable (in the context of the trade) and requires a Settlement Currency.

Please refer to Best Practice Guidelines and FAQs that can be found in the Other Documents section on the [DSB website](#).

5.2 Additional Comments

For NDF products, only “CASH” is supported as Delivery type and will display the value in the derived section. The value will differ in the request since DSB OTC ISIN added the delivery type in the request attributes but does not allow to choose “Physical” as Delivery type.

6 APPENDIX 1 – ISO 4914 EQUIVALENCE
