STATISTICAL REPORT

December 2021

3.0%
Increase in total OTC ISINs From Nov'21 to Dec'21

The Derivatives Service Bureau is a global numbering agency that issues ISINs and maintains the definitions of instruments through the fully automated generation of International Securities Identification Numbers (ISINs), Classification of Financial Instruments (CFI) codes and Financial Instrument Short Name (FISN), all globally recognised and adopted ISO standards for identifying, classifying and describing financial instruments.

From July 2022 onwards, the DSB also expects to be designated by the European Securities and Markets Authority as the sole numbering agency for users of UPIs as well as operator of the UPI reference data library.

December Metrics

Highlights

Commodities: Forwards represent almost half of all created volume, with Single Index instruments having the highest MoM % increase (5.8%), however absolute numbers of OTC ISINs created for this instrument type remains relatively low

Credit: Corporate SN CDS represent approximately three-quarters of all created volume, and Single Name CDS, which represent 388,284 instruments (51.2%), with 59% of all OTC ISINs ever created, were created in December 2021

Equities: Price Return Basic Performance Single Name Swaps represent around 65% of the total OTC equity derivatives ISINs created, while Portfolio Swap Single Index instruments saw the largest MoM % change at 32%

FX: FX Swaps represent almost half of all created OTC FX volume while Non Deliverable FX Swap instruments had the launch of the DSB's OTC ISIN and CFI service

Rates: Fixed Float Swaps represent around 42% of the total Rates OTC ISINs created. Basis OIS Swaps, which represent 361,336 OTC ISINs, or 47% of all OTC ISINs ever created, are responsible for the absolute number of LIBOR reform related OTC ISINs created, which reflects industry efforts to meet regulatory deadlines. More to follow on this in a separate paper. Please contact info@anna-dsb.com if you'd like to be added or remove or subscribe to receive "Analysis and Newsletter Updates" by clicking on this link.

Other: OTC ISINs for instrument type Other jumped by 3.6% MoM, with a general increase in all three types of instruments in this category

This month, create requests hit the biggest number since Oct 2020. Equity Price Return Basic Performance Single Name Swaps represent almost 1% of all created volume.

The number of searches conducted by users decreased significantly this month, although the total number of search requests still exceeds the total number of ISINs created for a sixth month in a row since the launch of the DSB's OTC ISIN and CFI service

The table that follows this infographic provides an instrument level view of the total number of OTC ISINs created for each instrument, as well as the month on month change.
